+ Custom Configurations

Our Mobile Office is a multifaceted tool designed for harsh environments. It incorporates comfort devices that office personnel have come to enjoy as well as rugged necessities.

Each office includes full environmental control and a heavy-duty power coupling to ensure more than adequate current for electrical devices. In addition a backup power supply system keeps sensitive equipment running where external power is uncertain.

Food is preserved in an under-counter refrigerator and food warming in the microwave oven, assuring minimal excursions.

An optional Satellite system (picture, right) is available for Global data and/or voice communication.

We will customize a Mobile Office to meet your special needs.

When you need rugged and secure office space and you need it quickly, PKMM has the solution. Our Mobile Office is durable and secure.
