

FIRE SCENE OBSERVER

FSD SAVES LIVES

The FSO is a compact Video System that Records in HD and streams video to many external devices. When properly configured, it can be used for post incident and training review or as a live training aid from a remote location.

The FSO improves live Fire Ground Safety and Operations when viewed by the Incident Command or Safety Officer. When on the Fire Ground, or near the Engine, other Departments/Agencies/Units can connect via the Wi-Fi

- Low Power Consumption
- Small Footprint
- Low profile appearance
- Color matched to apparatus
- Low apparatus impact

Specifications:

- * 2 cameras
- * Video storage of 480 hours onboard
- * Wireless interface
